SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: August 27, 1992
TO: Hamed Hassan
FROM: Larry M. Bowen /s/ LMB
SUBJECT: Source Test Analysis Fees

This is in response to your inquiry, in preparation of "dugout" permit processing, regarding the applicability of a \$1,600 fee for source test protocol and test result analysis to be assessed before permit issuance for each small boiler application that was subject to the modification and subsequent source testing requirements of Rules 1146 and 1146.1. After a review of the situation, including the amount of work required by the District to complete the analysis and permit evaluation, as well as past practice by other units, I have concluded, in this case, that no additional fee beyond the permit evaluation fee should be charged.

I understand this will allow you to take final action on a number of pending applications with "dugout" that otherwise would have been unworkable. Please advise me if I can be of further assistance in this manner.
